PROFESSIONAL SUMMARY

QA Manager with **10+ years** in travel-tech, leading a 4-person QA team and owning product quality for an online travel booking platform across desktop web, mobile web, Android and iOS. Designs risk-based test strategies and builds automation in **JavaScript/TypeScript** with **Playwright, Cypress, WebdriverIO, Appium and Postman**, integrated into CI/CD in Agile/Scrum. Pioneers **AI-assisted QA**: 35+ custom AI agent skills (Claude, MCP) and a knowledge base of 4,000+ test cases that run E2E tests, Jira ticket verification and QA reporting.

CORE COMPETENCIES

- ✓ Test Strategy & Planning
- ✓ E2E Booking Flow Automation
- ✓ Mobile App Testing
- ✓ Production Error Triage (Sentry)
- ✓ Test Automation Frameworks
- ✓ Payment Testing (3DS / OTP, e-wallet)
- ✓ API Testing & Validation
- ✓ QA Team Leadership & Release Sign-off

PROFESSIONAL EXPERIENCE

Quality Assurance Manager

Jan 2019 – Present

Online travel booking platform · Jakarta, Indonesia

- Lead a **4-person QA team** (3 QA engineers) and own end-to-end product quality for desktop web, mobile web, Android and iOS; define manual and automation test strategy integrated into CI/CD.
- Built an **AI-assisted QA** practice: 35+ custom AI agent skills (Claude, MCP) and a structured knowledge base that automate E2E testing, Jira ticket verification and QA reporting.
- Automate complete booking journeys (search → booking form → payment → order verification) for flight, hotel, activity, train and bus with Playwright, WebdriverIO, Cypress and Appium.
- Drive payment QA (card 3DS/OTP, PayPal, e-wallets, vouchers) and run regression, smoke, exploratory, i18n/L10n (incl. RTL), SSO/OAuth and deeplink testing; own native app release sign-off.
- Triage production errors daily in **Sentry** for web and mobile, trace customer complaints to root cause and escalate to engineering.
- Established QA metrics, weekly and quarterly reporting and 11 SOPs, increasing test coverage, reducing production defects and shortening release cycles.

QA Engineer (Manual & Automation)

Jan 2016 – Jan 2019

Online travel booking platform · Jakarta, Indonesia

- Executed functional, regression and cross-platform testing for web and mobile products.
- Designed test cases and built automated test scripts and API test collections using Postman and automation frameworks.
- Reported and tracked defects with developers to ensure stable, high-quality releases.

SELECTED PROJECTS

QA Dashboard — one dashboard for the QA team (Python): test case management (4,000+ Markdown cases), automation reports (daily E2E results, coverage), AI QA assistance, bugs and quarterly reports.

Zendesk + Sentry Integration — helpdesk ticket → customer journey → Sentry match → bug verdict; confirmed bugs sent to Slack.

App Release Tracking — Android and iOS release log, regression checklist, device coverage and sign-off history.
